MULTI-PURPOSE CANNULA FOR ASSISTED HUMAN REPRODUCTION

A) The Seminor Rigid is a semi-rigid catheter for intrauterine and cervical insemination.
B) The Seminor Flexible is a catheter for intrauterine and cervical insemination.

FEATURES
- the Seminor Rigid (A) can be shaped according to the degree of uterine flexion
- the Seminor Flexible (B) enables easy insertion with minimal patient discomfort
- the conical proximal end closes the cervix adequately for maximum sperm transfer
- as result of a direct connection between Seminor and syringe, the loss of spermatozoa during the transfer is minimized

GYNO INFO SEMINOR RIGID/FLEXIBLE

Length  48 mm (± 0.5 mm)
Volume  min. 0.098 ml
Sterile  sterilized by radiation
Packaging 125/shipping box
Quality control MEA and LAL
Order number A) #4502 A
           B) #4502 B
